

Boundary Information Group

Providing Critical Information for Health Care Organizations

Boundary Information Group consultants are dedicated to improving patient care, services and operational efficiencies in the health care industry. We participate in national leadership positions, testify before NCVHS and national committees, actively collaborate with other leaders to develop health care policies, and frequently speak at national conferences. We are independent consultants who are software and hardware neutral in our approach. Our health care industry strategic plan development and process improvement experience spans more than 25 years and has included hospitals, physician practices, insurance companies, TPAs, government agencies, and system vendor clients.

Our management consulting services include:

- HIPAA (www.hipaainfo.net)
- Electronic Medical Records
- Patient Safety
- Bioterrorism

BIG Consultants Include:

Margret Amatayakul, MBA, RHIA, CHPS, FHIMSS
